Subject: Proposal for Oconee Joint Regional Sewer Authority Rate Study

Dear Mr. Eleazar:

Raftelis Financial Consultants, Inc. (Raftelis) is pleased to submit this proposal to provide financial consulting services to the Oconee Joint Regional Sewer Authority (OJRSA). We appreciate the opportunity to submit this proposal, which details our understanding and approach to meeting OJRSA's objectives.

Project Understanding

OJRSA was established through a series of legal acts, resolutions and agreements that began with the creation of the Oconee County Sewer Commission in 1971. Since that time, several agreements have been made to clarify roles and responsibilities with regard to the provisions of sewer in Oconee County, ultimately ending with the creation of OJRSA in 2007. Entities involved in OJRSA include Oconee County, OJRSA, the City of Seneca, the City of Walhalla, the City of Westminster, and the Town of West Union.

In 2024, OJRSA secured funding from the South Carolina Rural Infrastructure Authority to fund a regional sewer feasibility study for Oconee County, SC. The goal of the study was to provide insight into key issues facing sewer service in the County and to outline recommendations to ensure that sewer operations in Oconee County remain viable for the future. The Study, which was performed by Ardurra (formerly W.K. Dickson & Co, Inc), Bolton & Menk, Inc. and Willdan Financial Services, was completed in August 2024 (2024 Regional Feasibility Planning Study) and provided several recommendations and next steps, which include the completion of a detailed financial and cost-of-service study that considers the 20-year capital improvement needs .

OJRSA has requested that Raftelis, in collaboration with Ardurra, Bolton & Menk, Pope Flynn, LLC (legal counsel), and First Tryon Advisors (financial advisor), together the "Project Team", prepare a scope of services to perform the detailed financial and cost-of-service analysis as identified in the 2024 Regional Feasibility Planning Study. The following project approach details the tasks that we believe are necessary to complete the study for OJRSA.

Scope of Services

We have developed the following Scope of Services based on our understanding of OJRSA's needs. The scope of services can be adjusted, as needed, to better suit the needs of OJRSA or address other rate and finance-related issues if they arise. Our proposed scope of services includes the items listed below.

Task 1: Project Initiation, Management, and Data Collection

The project management task begins with the submittal of this engagement letter and continues throughout the duration of the Study. It is designed to ensure the Study progresses in an efficient and deliberate manner. This task will include administrative components related to project management and quality assurance and control processes.

As part of this task and since Raftelis will be a new addition to the team that performed the 2024 Regional Feasibility Planning Study, a kick-off meeting will be held to ensure we have a thorough understanding of all available information for this study and the relationships among stakeholders.

Raftelis will prepare and submit to OJRSA and member entities a detailed data request list so readily available data can be forwarded to Raftelis. The data required will include, but not be limited to, operating and capital budgets, customer billing information, financial reports, population or growth forecasts, ordinances, and contractual agreements. Note that this information will be needed from each entity (Oconee County, OJRSA, the City of Seneca, the City of Walhalla, the City of Westminster, and the Town of West Union).

Task 2: Project Revenue Requirements

The first step in the study process will be developing forecasts of revenue requirements. The revenue requirements will include all operating and maintenance (O&M) costs, capital costs (including annual debt service payments and cash-financed capital), and reserve requirements.

Using information and documents provided as part of the 2024 Regional Feasibility Planning Study and information provided in response to the data request, Raftelis will prepare a revenue requirement forecast for OJRSA. The revenue requirements will consider costs for a consolidated system to include OJRSA, Oconee County, City of Seneca, City of Walhalla, City of Westminster, and the Town of West Union.

Raftelis understands that the data provided as part of the 2024 Regional Feasibility Planning Study will be used to determine a projection of operating expenses for a consolidated system and entity. Raftelis will rely on these estimates, as well as those from Ardurra and Bolton & Menk, to establish the combined system operating costs. To the extent necessary, Raftelis will collaborate with the Project Team to ensure that reasonable estimates for additional operating costs and/or cost efficiencies from economies of scale are considered. A forecast of system operating expenses will be prepared that accounts for cost increases driven by system growth and general inflation.

The projection of revenue requirements will reflect the individual system's current and future capital needs, as established in the previous studies. Additionally, it is our understanding that each individual entity/utility has been asked to provide capital plans as a directive of the results of the 2024 Regional Feasibility Planning Study. Capital project costs will be compiled and, with assistance from Ardurra and Bolton & Menk, a five-to-ten-year capital project list will be established. Funding sources for future capital projects will include a combination of rates/cash, grants, and future debt (as discussed further in the following paragraph).

Revenue requirements must consider current and future debt service costs. Payment schedules for existing OJRSA debt will be paired with future debt service cost related to: 1) planned debt-funded capital projects for the combined system and 2) if applicable, the retirement of debt associated with the assets for the local collection systems (Oconee County, the City of Seneca, the City of Walhalla, the City of Westminster, and/or the Town of West Union). Raftelis will rely on First Tryon Advisors to advise on the size, timing, terms, and structure of all future debt issuances.

The forecast of revenue requirements will consider certain financial and debt policies, including debt service coverage and days cash on hand. Policies and metrics will be identified, tracked, and incorporated into the forecast of revenue requirements. Raftelis will meet with OJRSA staff to review all components of the forecast of revenue requirements. We will solicit staff input to ensure the forecast is consistent with the expressed financial objectives.

Task 3: Establish and Forecast Billable Units of Service

Raftelis will examine each entity's billing records to determine customer demand for wastewater service. To do so, Raftelis will use detailed water/sewer usage information from each of the sewer entities. Based on the information obtained, Raftelis will develop a forecast of billable units of service over a five-to-ten-year forecast period using growth assumptions for each entity or utility's service area. We will discuss key assumptions with OJRSA staff and the Project Team to ensure consistency with previous studies and local knowledge.

Task 4: Calculate Rates

The next step in the study process is to calculate retail rates for a combined system using the analyses from Tasks 2 and 3. Rates will be calculated using wastewater cost-of-service concepts for each year in the forecast period and adjusted, where possible, to provide for a smooth forecast of rates. Customer impact analyses will be performed to understand the impact of proposed rate changes to different types of customers from each entity. This will help OJRSA assess the full impacts on customers under individual and consolidated systems.

A combined/consolidated entity will also need to consider other rate/cost mechanisms to reflect the new structure of local sewer service. For example, it may be appropriate to consider a billing charge (cost per-bill charge) that OJRSA is responsible for paying to local water providers for billing on OJRSA's behalf. We will discuss these items with OJRSA and the Project Team at the kickoff meeting to ensure a comprehensive list of rates/charges for evaluation is established. Fee methodologies will be established that are straightforward and consistent with industry standards.

Task 5: Model Development

At the heart of any successful rate study is the model used to develop revenue requirements and perform operational and capital financial planning, review customer information, and calculate rates and revenues. The model incorporates the results of each of the other tasks in the engagement, and is sophisticated enough to perform the complex calculations involved in a comprehensive rate analysis with the ability to analyze various rate scenarios.

The model created for this engagement will be developed using Microsoft Excel and will be based on a model framework that incorporates industry-standard rate-setting methodologies in a user-

4

friendly manner. The rate model will be built using our innovative modeling approach and will include a customized and interactive dashboard.

Task 6: Recommendations & Presentation

Raftelis will be able to assist OJRSA as necessary in presenting the results of the study and supporting study recommendations. We will work with OJRSA to determine the most appropriate level of stakeholder interaction. For the purpose of this scope of services, we have included three in-person presentations.

Project Fees

We propose to complete the scope of work detailed in this engagement letter for fees and expenses not-to-exceed \$99,605. Estimated fees assume approximately 323 professional hours. Attachment A provides a work plan, detailing our anticipated level of effort. The project fees are based on our standard hourly billing rates for professional and administrative personnel assigned to the project, plus direct expenses. Expenses would relate to travel costs, computers, postage, supplies, etc.

It is our practice to bill monthly for fees and expenses as they are incurred during a project. The attached work plan provides an estimate of the time required to complete each task, and we reserve the right to shift hours among tasks and personnel as circumstances may change during the project. Total fees and expenses will be limited to the not-to-exceed amount unless specific approval for an adjustment in scope is approved by OJRSA. If actual fees incurred are less than the estimated fees in the work plan, then these savings will be retained by OJRSA.

Project Schedule

It is Raftelis' understanding that OJRSA would like to have the combined system rate study completed as soon as possible. Raftelis anticipates that the study can be completed by the end of September 2026, however, much of the analysis is dependent on information to be provided by outside parties. Raftelis will work with OJRSA to try and meet desired timeframe recognizing that there may be issues that arise.

We look forward to working with you and your team at OJRSA. Should you have any questions, please do not hesitate to contact me at (704)373-1199. If the provisions of this engagement letter are acceptable, please sign and return one copy of the letter for our files. We are delighted to have this opportunity to be of continued assistance to OJRSA.

Very truly yours,
